NeuroParts™

MJF EDITION · NOVEMBER 2026

FOR HP JET FUSION SHOPS

Every MJF build, from quote to invoice.

Quoting and production software made for Multi Jet Fusion. It prices parts the way MJF really prints them, packs and balances every build in 3D, and runs the shop from the customer's first file to the paid invoice.

MJF edition

£790 / month

€910 · $1,060 · 5 users

Sales, Production and the Production autopilot, set up for MJF only, with the heat map and even heat balancing. One technology and one simple panel, with no menus for processes you do not run.

Also available through our reseller partners.

INCLUDED

Three parts, one login

Sales

Sales Agent learns from your won and lost quotes, checks prices and suggests the week's follow-ups.

- Instant MJF quotes from STEP, STL and 3MF
- Customer portal with card payment
- AI website assistant that prices and designs parts
- Quotes from 2D drawings, inbox, CRM, supplier quotes

Production

Production Agent learns what each order really cost and where the time and material went.

- Builds, 3D nesting, machines, stock and material lots
- MJF heat map and even heat balancing
- Real cost and margin, QC pass/fail and CoC
- Invoices, QuickBooks or Xero, DHL labels

Production autopilot

Builds that fill themselves. Your team checks each build and sends it.

- Adds new orders to open builds
- Tells you when a build is ready to check
- Starts a new build only when a part fits no open build

MADE FOR MJF

Priced and nested the way MJF prints

MJF materials, ready to quote
PA 12, PA 11, PA 12 GB, TPU and PP, with bead blasting, dyeing and vapour smoothing. Preloaded, with prices you can change.

Nested in 3D
Parts are packed into the Jet Fusion chamber in 3D, stacked through the powder bed and fitted inside each other's open shapes.

Heat you can see
The heat map shows the melted area of every layer, and thermal optimisation spreads thick sections through the build.

The real cost of a build
Builds, nesting density, print time, material and powder waste, worked out before you send the quote.

Your Jet Fusion machines
Pick your machines in the setup wizard, from the Jet Fusion 300 series to the 5600 series. The chamber size is set for you.

Count a batch with one photo
Photograph the parts on a phone. AI marks every piece and circles defects such as leftover powder, and a person confirms.

Prices are per company and exclude VAT. They are the same whether the AI is on or off. With AI off, the agents pause and everything else keeps working.

Nothing to install: it runs in the browser, always the latest version. Updates and support included, no setup fee.

Your data: kept in Frankfurt (EU), for your company only. Two-step sign-in for every user.

Free trial: 14 days on your own parts. No card needed to start.
